PROFILE

Full-stack developer who designs, builds and ships complete products: React and Next.js front ends, React Native mobile apps, and Node.js APIs on MongoDB and PostgreSQL. Recent work includes a client-side encrypted vault, a school management portal with online fee payments, and an operations system for a serviced apartment business. Comfortable owning a product from requirements and data model through testing and deployment.

TECHNICAL SKILLS

Languages	JavaScript (ES6+), TypeScript, HTML, CSS/SCSS
Front end	React 19, Next.js (App Router), React Router, TanStack Query, Redux Toolkit, Zustand, React Hook Form, Zod, Tailwind CSS, Radix UI, PWA
Mobile	React Native, Expo, Expo Router, NativeWind
Back end	Node.js, Express 5, REST APIs, JWT and session authentication, passkeys (WebAuthn), background jobs
Databases	MongoDB with Mongoose, PostgreSQL with Prisma
Testing	Vitest, Jest, Playwright, Supertest, React Testing Library
Tools and services	Git and GitHub, Vercel, Render, Cloudinary, Paystack, Flutterwave, Twilio, Figma

SELECTED PROJECTS

Anivad - encrypted vault for .env files and personal documents 2026

React 19, TypeScript, Vite PWA, Express 5, MongoDB, Web Crypto, Playwright

- Built an installable web vault that encrypts every file in the browser with AES-256-GCM before upload, so the server and object storage only ever hold ciphertext.
- Separated sign-in from unlock: passkey or password plus authenticator sign-in, then a passphrase-derived key (Argon2id in a Web Worker) the server never sees, with an offline recovery key.
- Wrote a lossless .env editor that preserves comments, order and quoting, and covered the production bundle with Playwright tests on Chromium, Firefox and WebKit.

SchoolFlo - school management portal for Nigerian secondary schools 2026

React, Vite, Zustand, SCSS, Node.js, Express, MongoDB, Paystack, Flutterwave, Cloudinary

- Built a portal for four roles (admin, teacher, student, parent) covering results, attendance, fees, assignments, library and timetables.
- Implemented grading with five score components, weighted GPA, class ranking and cumulative reporting across terms, with printable PDF report output.
- Integrated online fee payment through Paystack and Flutterwave, email notifications, SMS announcements, and CSV bulk import of student and teacher accounts.

Inventra - operations system for a serviced apartment business 2026

React 19, TypeScript, Tailwind CSS, Express 5, Prisma, PostgreSQL, Vitest, Playwright

- Built staff-only software for reservations, availability, guests, check-in and check-out, payments, expenses, reporting and audit.
- Made double bookings impossible at the database level with a PostgreSQL exclusion constraint, instead of relying on application code.
- Shared types, permissions and money and date helpers between API and web in a TypeScript monorepo, with integration and end-to-end tests on the business rules.

Linafri - service-apartment marketplace for Lagos and Abuja 2026

Next.js 16 (App Router), TypeScript, Tailwind CSS 4, Prisma, PostgreSQL, Better Auth, Leaflet

- Building a marketplace with guest, host and admin roles, email-verified accounts and a host application review flow.
- Set up strict TypeScript, Zod validation, map-based listings with Leaflet, and unit and integration tests with Vitest.

StarTech Staff - staff management app for StarTech One 2026

React 19, TanStack Query, Tailwind CSS, Radix UI, Express 5, MongoDB, JWT

- Built the company's internal staff portal: role-based access for admins and staff, departments, clock-in and clock-out, task assignment, and profile and salary records.
- Added scheduled jobs, Excel exports and Cloudinary uploads; the portal is being extended into a full HR system.

Momenta - one-photo-a-day mobile app 2026

React Native, Expo, Expo Router, NativeWind, AsyncStorage

- Built a local-first mobile app with no account or back end: one photo a day, grouped into weekly, monthly and yearly moments, with daily reminders and Jest unit tests.

WORK EXPERIENCE

StarTechOne Nigeria Limited
Nov 2022 - Dec 2025 | Lokoja, Nigeria

Product Manager, Frontend Developer and Frontend Tutor

- Implemented pixel-accurate, responsive interfaces from Figma designs.
- Refactored data fetching with React Query, removing redundant API calls and improving client-side caching.
- Reduced the initial bundle size with code splitting and dynamic imports, improving site speed.
- Ran tutoring sessions on frontend technologies and mentored junior developers and students.

Jaed Global Resources Limited
Jul 2020 - Oct 2022 | Lokoja, Nigeria

ICT Manager

- Managed all ICT operations, including systems setup, technical support and software installation.
- Designed and maintained the company website, and set up custom staff email accounts through cPanel.

Kenneth Price Nig Ltd
Nov 2019 - Jun 2020 | Abuja, Nigeria

ICT Manager

- Delivered digital design projects for clients from concept to completion, including social media graphics, banners and marketing assets.

EDUCATION

Kogi State University, Anyigba
B.Sc. (Education) in Physics

Graduated August 2018
